

The Learner's Greek New Testament Series
PARSING GUIDE

Welcome to this outline presentation of what can be found in the extensive parsing guide likely known only partially in other works of the same name. The PARSING GUIDE is divided into six sections. The sections are explained briefly below then illustrated under the various section headings. Only brief examples are selected randomly out of thousands available. All forms are contained in the complete volume.

SECTION I: EVERY NT VERSE PARSING has book-by-book, chapter-by-chapter and verse-by-verse parsings of all verbs, participles and infinitives.

SECTION II: SAMPLE PARSINGS will show the way the verb λύω is parsed without requiring the student to thumb through different chapters of a grammar book. To broaden the exposure and increase learning, paradigms of contract verbs τιμάω, δοκέω and δηλόω are provided along with paradigms of δίδωμι, οἶδα, εἰμί and γίνομαι. Likewise, the parsing of participles for λύω appear but, because λύω has no 2nd Aorist forms, λείπω is substituted for its 2nd Aorist forms.

SECTION III: PARSINGS OF ALL NT VERBS are provided with their Indicative, Imperative, Subjective and Optative forms in all their tenses and voices. Seeing all the New Testament forms clustered together will quickly familiarize a student with the tell-tale patterns typifying the development of verbs.

SECTION IV: PARSINGS OF ALL NT PARTICIPLES from present tense to pluperfect are presented in their masculine, feminine and neuter singular and plural forms.

SECTION V: PARSINGS OF ALL NT INFINITIVES will lay out all infinitives from present to 2nd perfect.

SECTION VI: ALPHABETICAL CONCORDANCE OF ALL NT VERBAL FORMS displays all NT verbals from alpha to omega in alphabetical order. Moreover, each form is displayed with the number of times it appears in the NT. The count and forms are based on the Nestle Text.
